📍 Lot 13 Niubasonga Road, Suva, Fiji

Education

University of the South Pacific (USP), Suva, Fiji Expected 2027
Bachelor of Software Engineering
Relevant coursework

Experience

University of the South Pacific (USP) Aug 2025 – Nov 2025
Tutor — USP PASS Leader

- Adapted teaching strategies for diverse learners by translating technical material into clear, structured explanations to improve comprehension across mixed-ability student groups.

Vinod Patel & Co. Ltd Jan 2024 – Feb 2024
Support Admin (Temporary)

- Processed customer orders and invoices accurately within enterprise systems, developing close attention to detail and reliable record-keeping for financial and operational documents.

JD Stationery Nov 2023 – Jan 2024
Sales Representative

- Guided customers through product selection in a fast-paced retail environment, strengthening communication and timely documentation of transactions and inventory movements.

Projects

IslandCart — Full-Stack E-Commerce Platform
/ React, TypeScript frontend · Node.js/Express backend · PostgreSQL (Neon) [GitHub](#)

- Built a full-stack e-commerce platform with a React/TypeScript frontend and Node.js/Express backend on PostgreSQL (Neon), implementing CRUD product flows and vendor ownership checks.
- Migrated data storage from flat JSON files to a relational PostgreSQL database to normalise product data, enforce referential integrity and enable SQL-based queries for reporting.
- Implemented a complete products feature with vendor ownership checks and role-based access control (RBAC) to ensure correct authorization for product creation, update and deletion.

Hospital Management System — CWM Hospital Group project, 2026
2026

- Led the group as Project Manager / Scrum Master for IS333, producing a Scrum-structured work breakdown schedule of ~37 activities, a PERT table, an Activity-on-Arrow (AOA) diagram, a Responsibility Assignment Matrix (RAM), and a working-day-aware Gantt chart to coordinate development and delivery.

TCP-Based File Transfer Application [GitHub](#)

- Built a Python socket-programming application for chunked binary file transfer with progress tracking and error handling to provide reliable, resumable transfers over TCP.

Smart Campus Network Design / CS310 2026

- Designed and configured a campus network in Cisco Packet Tracer covering VLSM subnetting, OSPF, NAT, ACLs, and wireless access REFERENCES

Technical Skills

Languages: Java, Python, TypeScript, PowerShell, JavaScript
AI/ML: data mining
Frameworks/Libraries: React, Node.js, Express
Databases: PostgreSQL
Tools & Platforms: JUnit 5, Selenium WebDriver, Postman, Windows Server, Git, draw.io, Excel, Figma, SharePoint
Networking & Protocols: Wireshark, Cisco Packet Tracer, OSPF, NAT
Security & SIEM: Nmap, Kali Linux
Other Technical Skills: Drizzle ORM, WEKA, JaCoCo, Active Directory, Clerk, Cloudinary, Leaflet, OpenStreetMap, Canva, defect logging, VLSM, ACLs, project monitoring, data/information management, data collection
